BIRCHVILLE
GARDENS
PLAINVILLE, CONN.

To Our Customers and Friends:

In keeping with our policy we are again offering a catalogue that we feel sure will be of value to its readers. We have spared no effort to make it comprehensive, concise, educational, and interesting.

Our selection of varieties is offered only after careful observation and consideration, and we feel sure our choice will please the majority of specialized glad lovers.

We have been asked to continue the chatterbox review. So again, this season, we will try to evaluate some of the newer varieties we are growing. This review is based on our own observations in the fields at Birchville Gardens. Our soil is sandy and the performance of some varieties may differ in other types of soil or in different climates. We give you this chatterbox review, however, with the hope it will be interesting reading and in some small way assist you in the selection of varieties.

WHITE—GLACIER and ARCTIC SNOW, two newcomers this season, will add strength to this already strong class. GLACIER is destined to be the most widely grown commercial white—really outstanding in both growth and beauty. The frilled ruffling of the snow white ARCTIC BEAUTY makes it one of the most beautiful of all whites. SNOW GARLAND, distinguished by extremely ruffled and heavy textured blooms, is also very beautiful. Varieties that cut close to 100% are what growers demand and certainly FLORENCE NIGHTINGALE, BOW-BELLS, CARMINE EYES, and WHITE SAILS stand at the top of the list.

CREAM—RIXEY again in 1959 proved to be the leader in its class with its wide open heavily ruffled cream florets touched off by a deeper cream throat. FLORADORA, one of the tallest, will win heavily at the shows. ANGEL'S SERENADE is certainly one of the most beautiful and with LORELEI, ARES and GOOD MORNING are tops as commercials. D'ARTAGNAN, a newcomer, will please you with its two red blotches and will become a leader at the shows.

YELLOW—YELLOW SPIRE grows tall and the beautiful florets make a ribbon of color. This is tops for exhibition. GARY is still, in our opinion, the best cut flower yellow on the market. With our lower 1960 price, this variety is a must for cut flower growers. GOLDEN FICTION from Holland is outstanding and has good color value. GOLDEN BOY and FALINE are tops in the 300 size. FIAT LUX, beautiful and very early, is outstanding. TOPOLINO, one of the butterfly varieties, is very striking. PARAGON and CONRAD are very tall good late varieties.

BUFF—VIVA is outstanding for its tall stretchy spikes and is tops for showing. RIVIERA, listed as buff, is more of an orange buff. It excels in florescence and we rate it as one of the best 1959 introductions. COPPERSHEEN and A. B. COUTTS are both outstanding having perfect growing habits.

ORANGE—CRONUS, a beautiful deep orange with a golden yellow throat, is very outstanding. GYPSY LOVE, one of the butterfly varieties has lovely color, grows tall and blooms fairly early. Caballero is one of the most striking novelties. DEBBIE, a true orange, is heavily ruffled and must be grown to appreciate its beauty. TIGERTONE is one of the best 300 size in this color class.

SALMON—As usual, PARFAIT was outstanding. This stellar variety cuts spikes right down the row that can easily win at the shows. ELF, another superb variety, is a 100% cutter of show spikes. TABARIN is very flashy and is one of our favorites. Size lovers can find satisfaction with SALMON QUEEN and SUGAR ELL, two wonderful growers. SUNDOWN, rated as salmon, is more on the orange side. It is one of the showiest in this class, produces terrific spikes that are a joy to see.

SCARLET—ALBERT SCHWEITZER, a glowing orange scarlet, is tops for exhibition. FIRECRACKER is a strong contender for the greatest fluorescence. SWISS FLAG is very flashy. HILLTOPPER and SANS SOUCI, as in the past, are still tops for cutting.

LIGHT PINK—Florists are enthusiastic about JILL. It has beautiful ruffling and color. CORONATION has all the good qualities to make it one of the best commercials. BRIDESMAID, a new one from Holland, is a beautiful pastel that bears watching. TEMPTRESS and TARGET both are outstanding tall growers that can easily win at the shows. TAMMY and DIMPLES will rate with the connoisseurs who love smaller glads.

MEDIUM & DEEP PINK—PINK SENSATION is the answer to a florist's prayer. It consistently produces tall spikes with 8 to 10 open. One can cut good tall spikes of COUNTESS right down the row with 8 open. Certainly worthy of a trial in your 1960 garden. Early blooming is the virtue of FRIENDSHIP plus good color and ruffling. BOUDOIR is the giant of this class, a real tall easy grower.

LIGHT & DEEP RED—My first choice for an all purpose red goes to RED PEPPER because it is so consistent that nearly every spike is of show caliber. INSURPASSABLE is very early and near 100% cutter of tall spikes. REDCOAT possesses unusual beauty of color and should have no difficulty winning at the shows. RED TAPE and RED RADIANCE are older varieties that are reliable as cut flowers.

BLACK RED—OSCAR, with its tall spikes opening up to 10 with flaring blooms, is one of the best European releases. DARK BRILLIANCE excels in ruffling and has a good dark sheen. NEGRO BOY is one of the best black red varieties. ACE OF SPADES gives the artistic touch to this group and is deepest of all and nearest to true black.

LIGHT & DEEP ROSE—A new variety, ROSEDENE, bears watching for it has good color, is heavily ruffled and is very early which should make it a leading commercial. GINA, as usual, was outstanding. This stellar variety cuts right down the row and has color few varieties can equal. GIPSY ROSE is one of the finest show glads as well as a top notch commercial. This will become extremely popular

BIRCHVILLE GARDENS — PLAINVILLE, CONNECTICUT

when the price is lower. FATHER STEVE is flashy and catches the eye. CORAL ROSE, one of the top showglads, is capable of opening 10 with the rest of the buds showing color.

LAVENDER—The advent of CATTLEYA marks a new advance in lavender. The form of its florets reminds one of an orchid. MAD HATTER, classified as lavender, is more of a rose lavender and is one of our favorites. This variety is unusual and should become popular. PRINCESS, CAMPANILE, ELIZABETH THE QUEEN, GAIL and TYRONE are all reliable commercial varieties. PADION is the first lavender to bloom and makes nice tall spikes.

PURPLE—KAREN is a most attractive purple. It is distinguished by long flowerheads and wonderful keeping qualities. KING DAVID has nice ruffled florets and is a top contender at any show. We like the deep color of WONDER BOY—has always been a favorite here. THE RAJAH and MABLE VIOLET are unsurpassed for cutting.

VIOLET—BLUE VEIL one of the tallest glads will add strength to this class. Has good deep rich color and is near 100% producer of good spikes. APOTHEOSIS, while not as refined, is reliable and should become very popular. BLUE PETER grows tall, but only opens about 5 blooms at a time, but is most popular. BLUE DEVIL is a rich tone novelty that always draws a lot of attention. BLUE CONQUEROR, BLUE GODDESS and SALMAN'S SENSATION are good growers and produce good healthy bulbs.

SMOKY—BLUE SMOKE is one of the most beautiful. RIMROCK shows promise of being one of the very best with uniform spikes right down the row. COMANCHE CHIEF is always spotted first by garden visitors—has unusual beauty of color. ORIENTAL SPLENDOR and VANITY FAIR will please those who want their glads different. Both are very popular and are worthy of a trial in your 1960 garden. TAN-GLO is still tops as a show variety, opening up to 10 easily on perfect spikes. BROWN LULLABY, PRUNELLA, MAGIC BEAUTY and COPPER LUSTRE will please you. We are sure all these are outstanding and unusual.

It would be impossible to conclude these comments without a word about the green glads. Green Ice will certainly be grown by the million just as soon as stock is available. Shamrock, while not so green, is very early and is a good grower that should be valuable for early cutflowers. Green Woodpecker opens 10 easily and is certainly going to be hard to beat at the shows. I will conclude these comments with reference to the Butterfly Varieties of K & M. Their rich color and bold blotches will endear them to your heart and bring added joy to your 1960 gladgarden.

In the foregoing paragraphs we have endeavored to give you an honest, concise appraisal of some of the newer varieties as well as the best recent introduction. We often wonder whether non-productive pages (pages not containing price list) are of any value to a catalogue and its mission. To this there is no conclusive answer, but we have long felt that interesting and instructive reading, together with good pictures and service features, are just as much a part of a successful catalogue as the actual price list itself. We certainly would like you to express an opinion as to whether or not we should continue chatterbox review each season.

We welcome your visits to Birchville Gardens to inspect the fields.

We are especially anxious for you to inspect the bulb house in which we take special pride.

Our sincere wish is for your success and happiness in your 1960 garden.

Sincerely,

James A. Milo

A Gift to You

This catalogue we send to you with our compliments, and we are glad to do this. Each year we try to improve upon its attractiveness, as well as to give you the latest up-to-date information.

But, like all good things, it costs a considerable amount of money to print thousands of catalogues each year; even more than you can perhaps imagine. Now our records show we do not receive an order from every person in our file, every year, nor do we expect this. However, we would appreciate receiving an order, even though it may be small, every second year or so. Some people are just catalogue collectors, some take up other hobbies and still others are forced to give up gardening for some reason or other. These we must eliminate from our files if we are to practice economy necessary to sound business.

So, if you like our catalogue and wish to continue receiving future copies, either send us an order, or mail us a postcard, stating you are still interested. To our many friends and customers, who through their loyal patronage have made this catalogue possible, we extend our sincere thanks and appreciation.

NEW INTRODUCTIONS FOR 1960

GIGI (Milo '60) 460-80

Excellent in its habits, lovely to look at, elegant and daintily beautiful, and gorgeous and buxom—the hallmark of a really good glad—its warmth and charm will enthrall you. Tall and stately and lavender colored, with its enchanting white throat, marks this as an unusually distinctive beauty. Altho it has some color characteristics peculiar to Tyrone, its tall spikes on sturdy green plants have 20 buds with 7 to 9 well open florets that are beguiling and of beauteous delicacy. As may be expected, the florets are formally placed with almost precision regularity. Superlative terms are used in describing this new creation but then this is a superlative lavender. In fact, its all glad and looks like a good glad should. We unhesitatingly recommend GIGI to you. Considering its near perfect qualities and unusual stamina, the introductory price is low. A grand glad, a beauty that can and should win honors in its color class, as well as being one of the very best commercials. This creation is destined to be grown by the million.

FROM JOHN T. MAJESKI AND LLOYD WEEKS

PINK FAVORITE (444 or 544) (Baerman-Majeski-Weeks 1960) Parentage lost. Midseason.

Have you ever wondered what a color would look like that stood on the exact border line between deep pink and light

red? Well, here it is, and we can assure you that it is a vivid, soul-satisfying hue (deeper than our picture reveals). Pink Favorite, as we decided to name it, is almost as deep as Valeria but much larger, opening 10 almost 500-size florets on every spike right down the row. You'll love the stretchy 24-bud spikes. This probably could not be shipped successfully in tight bud, but as a local cut flower it should be a top-notch. The spikes are tremendous.

Large, each \$1.00. Medium, each \$.75. One large and 10 blbts. for \$2.00. Grower's Sample Unit: 1L, 2M, 3S and 50 blbts. for \$7.50.

PINK PROSPECTOR (440) (Baerman-Weeks-Majeski 1960) (Prospector x Golden Sunshine) Midseason.

Here is a flesh-pink derived from two yellows which should have been named "Candlelight" had the name been available, because of the glowing effect of the yellow underlay which shines forth especially in the throat. Do you know of another glad of just this color? We can think of none. Indeed, flesh-pinks are rare, and here is one so exquisitely tinted, so warmly glowing, with ruffles so neatly shirred, that it readily takes its place as one of the most beautiful of all glads. Pink Prospector produces those tall uniform spikes right down the row that you love to cut.

Large, each \$1.50. Medium, each \$1.00. One large and 10 blbts. for \$3.00. Grower's Sample Unit: 1L, 2M, 3S and 50 blbts. for \$11.00.

Lavender Frills

Top Brass

Rainier

LAVENDER FRILLS (364) (Baerman-Weeks 1960)

This is a beautifully frilled blue-lavender blending to a lighter throat. It is very similar to Wedgwood but opens 9 blooms in very formal array. Lavender Frills is a very waxy, sprightly flower with a high type of beauty. It's a natural for arrangements. A generous stock makes feasible our modest prices. **Large, each \$1.00. Medium, each \$.75. One large and 10 blbts. for \$2.00. Grower's Sample Unit: 1L, 2M, 4S and 50 blbts. for \$7.50.**

TOP BRASS (416) (Baerman-Weeks) (Golden Sunshine x Prospector) Late.

Of eighty good yellows reselected two years ago, this has proved to be one of the best. Top Brass is the second tallest of the group with 20 buds and up to nine open blooms. Color is a medium deep yellow, virtually a self. Heavy substance, generous ruffling, and flat-open blooms make this a classical yellow. Top Brass is very precocious, making surprisingly stretchy spikes even from bulblets.

Large, each \$2.00. Medium, each \$1.50. One large and 10 blbts. for \$4.00. Grower's Sample Unit: 1L, 2M, 3S and 50 blbts. for \$12.50.

RAINIER (400) (Baerman-Weeks-Majeski 1960) (Innocence x Southern Belle) Midseason.

From exactly the same parentage as that of Abiqua and Chemawa comes this massive, immaculate, beautifully ruffled milk-white with a touch of cream in the throat. Rainier opens 8-10 formally arranged florets on 24-bud spikes nearly five feet tall. A fine commercial prospect that we unreservedly recommend. Rainier should also be a top show winner.

Large, each \$2.00. Medium, each \$1.50. One large and 10 blbts. for \$4.00. Grower's Sample Unit: 1L, 2M, 3S and 50 blbts. for \$12.50.

LAVENDER SPIRE (460) (Baerman-Majeski 1960)

Finding good names for glads is not easy. So when a seedling practically names itself, as this 66" lavender did, one can't help being grateful. Lavender Spire is a cool, pure light lavender with a snowy throat. Eight or nine florets are open on 33" flowerheads. This seedling is similar to Campanile but, in our experience, an improvement. It is just the tint of cool lavender in demand with florists. A very healthy variety with good placement.

Large, each \$2.00. Medium, each \$1.50. One large and 10 blbts. for \$4.00. Grower's Sample Unit: 1L, 2M, 3S and 50 blbts. for \$13.50.

LAVANESQUE (464) (Baerman-Wagner 1960) (Innocence x Sister Seedling of Emperor) Early-mid-season

This tall ribbony blue-lavender paling to a lighter throat is distinguished by the fact that it opens a full baker's dozen of blooms at one time except when the thermometer is in the nineties, when it will do about ten. I know of no other lavender to equal it. Also, it is the acme of regularity as to placement: at the peak of its bloom we could find only one misplaced floret. This should be a wonderful local cut-flower and a show contender for most open blooms. Heavy propagation permits an extremely modest price.

Large, each \$1.00. Medium, each \$.75. Small, each \$.50. 20 blbts. for \$1.00. Grower's Sample Unit: 1L, 2M, 6S and 100 blbts. for \$7.50.

PANDA

FROM ALEX SUMMERVILLE

PANDA (Larus '60) (Peggy Ann X Figurine) 201—Midseason.

A real improvement in its color class both for exhibition and decorative purposes. The lightly ruffled creamy white $3\frac{1}{2}$ inch florets have a small rose blotch on a pale yellow throat, an attractive combination, and well formed florets. Spikes are uniformly tall about 50 inches or more with a 25 inch flowerhead and 19 to 22 buds of which 5 to 8 are open at a time. Its fine growth habits and attractive appearance have earned for it an American Home Award at Boston in 1956, highest scoring Miniature there; and best Three Spike Seedling at the 1959 Eastern International. This may well prove to be the leading miniature introduction of 1960!

Any size \$1.00—1 bulb and 10 bulblets \$2.50.

SANCY (Larus '60) (Peggy Ann X Twinkles) 226—Early.

A most outstanding little glad that has never failed to attract favorable comment whenever it has been shown. The striking $3\frac{1}{4}$ inch florets are bright salmon orange with cream lip petals. Opens 6 or 7 of its 21 buds on flowerheads of 21 to 26 inches. Plant height ranges from 45 to 50 inches. Has won an impressive number of awards as a seedling, including best Miniature at Western Mass. in 1955; New Jersey Seedling Award in 1958; and best Miniature Seedling South Jersey in 1958. Sancy will prove to be an excellent show glad in a

weak class and its excellent color value will make it extremely valuable for decorative purposes.

Large \$1.00—Medium .75—Small .50—Bulblets 10 for \$1.50

1 Large, 1 Medium, 1 Small, and 10 Bulblets Only \$3.00

WIDGET (Larus '60) (Peggy Ann X Twinkles) 205 Early.

Those who have seen Widget at the shows have eagerly awaited its introduction. The coloring is most unusual and most attractive. The main color is chartreuse but the $3\frac{1}{2}$ inch ruffled florets have a medium pink border on each petal and a small light red spot in the throat. Spikes are 37 to 45 inches tall with 6 to 7 usually well-placed florets open on 18 to 23 inch flowerheads. Total bud count runs 16 to 20. Scored "A" at Western Massachusetts in 1958 but its outstanding potential is in decorative field. Get Widget and you'll really feel you've gotten your money's worth.

Large \$1.00—Medium .75—Small .50—Bulblets 10 for \$1.50

1 Large, 1 Medium, 1 Small, and 10 Bulblets Only \$3.00

TOWHEAD (Larus '60) (Peggy Ann X Statuette) 214 Midseason.

Any one interested in growing quality spikes should try Towhead—it is destined to become a heavy winner. The lightly ruffled $3\frac{1}{2}$ inch florets are creamy yellow and slightly darker in the throat. Spikes stand over 50 inches tall and carry heads of 22 to 25 inches with 6 to 8 of 23 buds open. A reliable producer of good straight spikes. Health and propagation are excellent.

Any size each \$1.00—Bulblets 10 for \$1.50

CIMARRON (Larus '60) (Rose Seedling X King David) 354—Late Midseason

It is generally agreed that the medium sized glads have been the most overlooked group. Growers and show fans are now on the alert for 300 size glads of real merit. Cimarron is an outstanding prospect from two standpoints; it has all the necessary attributes to make it a leading show winner; and its outstanding health will prove it to be a fine garden variety and a promising commercial. Consistently opens 8 in perfect formal placement on heads of 25 to 28 inches. Spikes stand up to 58 inches tall and carry 20 to 25 buds. No crooking, flecking or other faults have appeared in five years of testing. The ruffled $4\frac{1}{2}$ inch florets are a rich medium rose shading lighter towards the throat and with a small purple blotch.

Large \$1.00—Medium .75—Small .50—Bulblets 10 for \$1.50

1 Large, 1 Medium, 1 Small, and 10 bulblets Only \$3.00

WING-DING (Summerville '60) (Aria X 5th Ave.) 246-85

This sister seedling of the widely heralded Bingo combines outstanding color value with vigorous habits of growth. Plants stand about 50 to 55 inches tall and carry heads of 25 inches with 23 buds and up to 9 open. Color is bright medium red with a black red edging—a most attractive combination. While the edging gives the appearance of ruffling, actually the petals are plain. A bouquet of Wing-Ding in a black vase will enthrall you. All who have seen it expect it to become a top show glad. Because of its outstanding health and easy propagation ability, we have a good stock and can offer Wing-Ding at an exceptionally low introductory price.

Any size, each .50—10 for \$4.00—Bulblets 10 for .75 or 100 for \$5.00

FROM DIRK KROON

LEILANI (Kroon '60) 251—Early

A lovely light rose with clear creamy white center. Daintily frilled, it will open 6 or more on very nice decorative-type spikes. Leilani was a runner-up for All-America Miniature Honors; it missed out on an award only because a few judges thought the flowerhead was not quite long enough as an exhibition miniature. For decorative use its round, frilled florets, its lovely coloring and dainty charm will endear it to every miniature fancier. A large stock permits a low introductory price.

Large .50—Medium .35—Small .25

BREAD & BUTTER (Kroon '60) 201—Early

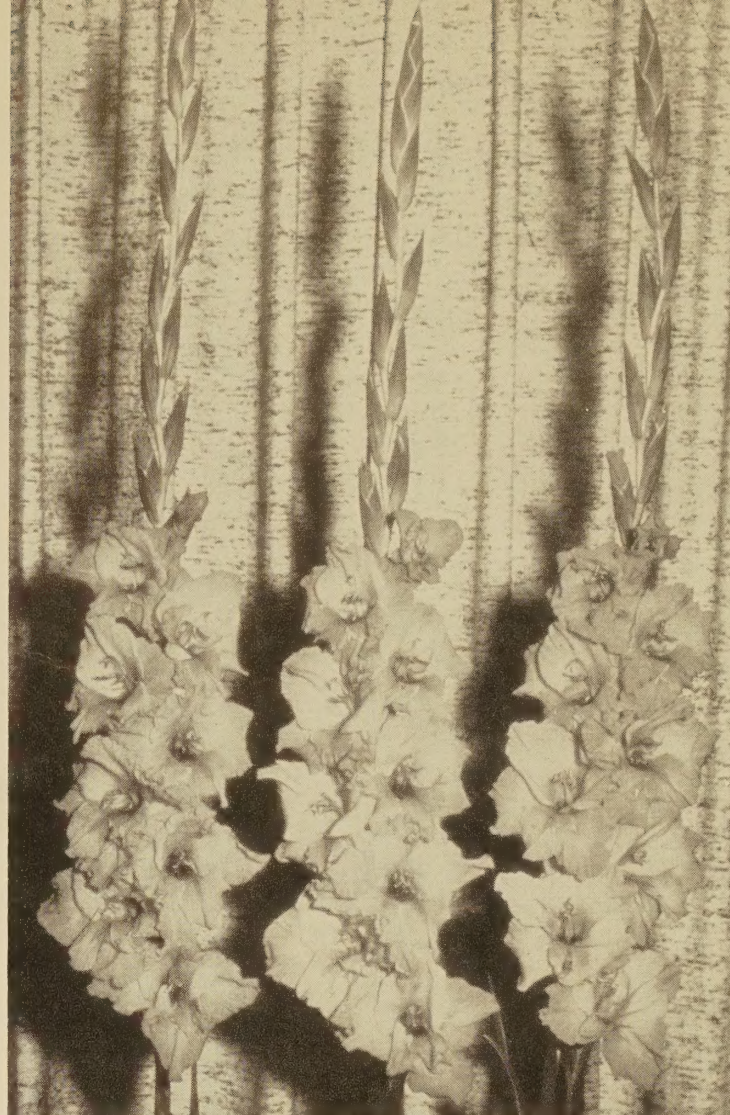

Immaculate white miniature with throat of pronounced golden yellow. Pure as driven snow and warm as sunshine. The tiny florets have heavy substance and are beautifully ruffled and recurved. It holds 6 open florets at once on a slender, graceful stem. Don't let the prosaic name mislead you. This is a supremely beautiful miniature. Of modest height but plenty tall for an ideal arrangement glad.

Any size bulb \$1.00—10 for \$8.00

CINDY (Kroon '60) 216—Midseason

The grace and beauty of this variety will please the most fastidious miniature lover. A very beautiful and striking variety with a lovely color of light yellow having a bright broad picotee orange edging extending well to the tips of the slightly frilled florets. Opens 6 to 7 on neat graceful stems. Because of a fairly large stock, Cindy is being offered at an exceptionally low introductory price.

Sensational Thrifty Buyers' Collections

For the past several years, these collections have been exceedingly popular. The demand has been so great and the satisfaction derived from them so much that we are again offering this planting stock at bargain prices. From unsolicited letters we have been informed how surprised they were not only by the size of the blooms but also by the fine large crop of corms harvested in the fall from these small bulbs (corms) and the fact that they were able to garner a large stock of name varieties. On late orders please name at least one extra variety we may substitute in case we are sold out of any variety ordered. All bulbs are No. 5 or No. 6 size as ordered.

SNOWSTORM

JOHN & LLOYD'S 1959 INTRODUCTIONS

SUNBURST (434) (Baerman-Majeski 1959) (Royal Stewart x Pactolus) Early.

Tricolors are the newest thing in glads. Here is one of rich, ruffled salmon-pink surmounted by a brilliant explosion blotch of velvety scarlet and bright canary yellow. There is nothing else like it. It stands out in any glad garden. The colors are actually more contrasty than our picture reveals.

Large, each \$1.00. Medium, each \$.75. Small, each \$.50. 15 blbts. for \$1.00. Grower's Unit: 1L, 2M, 5S and 100 blbts. for \$9.00.

SNOWSTORM (400) (Baerman-Majeski 1959) (Sister of Emperor X) (Evangeline x Snowbank) Midseason.

Our picture of this waxiest of whites is so accurate a lengthy description is unnecessary. There is no more beautiful white in existence. This is a fancier's flower, however, rather than a commercial type. It responds to careful culture. Our 1960 introduction, Rainier, is taller and more rugged. Try them both.

Large, each \$1.00. Medium, each \$.75. Small, each \$.50. 15 blbts. for \$1.00. Grower's Unit: 10 assorted bulbs and 100 blbts. for \$9.00.

VIOLET QUEEN (476) (Baerman-Weeks 1959) (Admiral x Caribbean) Very early.

The printer "did us wrong" last year in printing this cool deep violet much too red. (We hope the picture turns out to be more accurate this year). If you like the rich deep violet of the well-known Elk's Pride petunia, you'll be delighted with its gladiolus counterpart. Deep violet is a very important hue for giving variety to the gladiolus colorama. Violet Queen is a husky grower of almost 500-size and with a bamboo stem. Try it! We're confident you'll be more than pleased.

Large, each \$1.00. Medium, each \$.75. Small, each \$.50. 15 blbts. for \$1.00. Grower's Unit: 10 assorted bulbs and 100 blbts. for \$9.00.

EIGHTH WONDER (466) (Baerman-Majeski 1959) (Emperor x Unknown) Very early.

Compared to the All-America winner, Emperor, Eighth Wonder is three weeks earlier, much lighter in color, and opens an even longer ribbon of bloom. The florets are extraordinarily flat-open and recurved. An ideal cut-flower type. Every spike is a "bouquet in itself."

Large, each \$1.00. Medium, each \$.75. 15 blbts. for \$1.00. Grower's Unit: 2L, 4M and 100 blbts. for \$9.00.

TOPAZ (416) (Baerman-Weeks 1959) (Golden Sunshine x Prospector) Midseason.

Of hundreds of seedlings from this interesting cross, Topaz has proved the fanciest, with such an intricate ruffling and frilling that it sparkles like a jewel. Its color is almost identical with that of Gold but with us it makes much longer spikes with 20-22 buds. A connoisseur's yellow.

Large, each \$1.00. Medium, each \$.75. 15 blbts. for \$1.00. Grower's Unit: 1L, 2M, 5S and 100 blbts. for \$9.00.

CHEMAWA (486) (Baerman-Weeks 1959) (Innocence x Southern Belle) Midseason.

Several growers and fanciers have been kind enough to tell us that they consider this the finest smoky in commerce. Most smokies are rather cloudy and often flecked. Chemawa, however, is velvet-smooth with a rich, deep old-rose color set off by a clean ivory throat. Between the old-rose and ivory is a pencil line of clear salmon. Spikes are wonderfully long and stretchy. Florets are beautifully ruffled and have lots of sheen. It will pay you to get started with this outstanding smoky. Chemawa is superb in arrangements and an ornament to any garden.

Large, each \$.60. Medium, each \$.40. Small, each \$.25. 30 blbts. for \$1.00. Grower's Unit: 10 assorted bulbs and 100 blbts. for \$5.00.

RIXEY (Kroon '59) 511-95

By far, one of the most sensational glads developed to date. It is good healthy grower, exceptionally strong with tall, straight spikes with up to 22 buds. Eight or more heavily ruffled six inch florets open at a time. Its elegance and wonderful substance, coupled with its lasting qualities and cut flower habits, make this glad a joy to growers and the flower trade. We can state unhesitatingly that this opens to perfection in water and retains its size to the last.

Rixey is a very beautiful soft cream with a deeper cream slightly darkening to yellow in the throat. Actually, a very gorgeous and pleasing color combination.

FROM ROSS MILLER**PEACH FESTIVAL** (Miller '59) 421-90

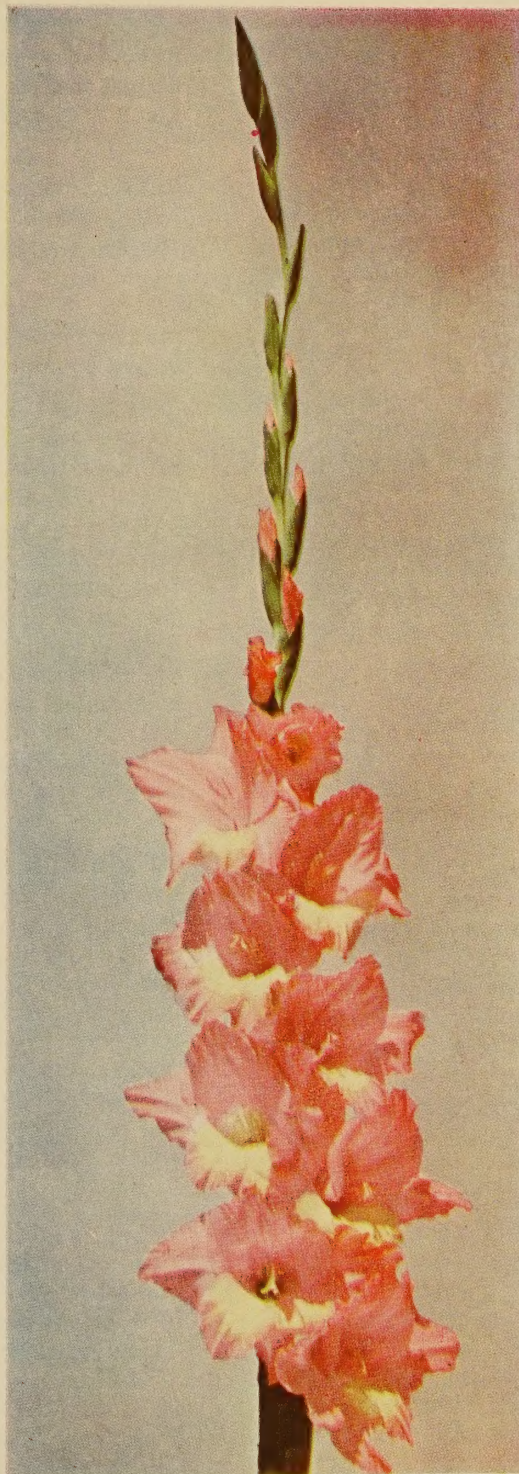

Introduced in '59 in a small way, we feel this superb glad should have a formal introduction in 1960. A large buffy peach-pink, Peach Festival throws tall spikes on which are 10 well placed open florets with extremely heavy ruffling and substance making this variety the ultimate in the ruffled type. It is a good producer of bulblets that are not only easy to germinate but grow into large bulbs as well. In 1959 Peach Festival won the Grand Champion at Boston, a Section Champion, and at least 5 other Blue Ribbon Awards on a very limited distribution of bulbs.

LANDMARK (David Walter White '60) 512-85

A real eye-stopper, this huge, tall cream will make your garden a "landmark" to passers-by. A row of these copious beauties, so formal and erect, is a never to be forgotten sight. An ethereal glow lights the lovely ruffled florets warming the heart of the beholder with their soft cream luminosity. Landmark is a glad of unusual stamina. The spikes, on sturdy, broad green plants, are extremely well built; florets formally placed with precision-like regularity, opening 10-14 of the 22 buds at once. The home gardener will be amazed at such a feat while the show enthusiasts will have a field day exhibiting this stupendous new All-America Gladiolus.

JOYOUS (John J. Flad '59) 464-87

An air of quiet elegance distinguishes the rich, velvety, deep rose of JOYOUS as one beholds this splendid new variety. Formal in type, the large ruffled florets are precisely styled and brilliantly colored—the lip petals having a somewhat deeper shade of luscious rose. JOYOUS, as the name connotes, is a joy to see in the garden. Its habits are regular, and its height consistently four and one-half to five feet. Eight or more lovely florets open at once on a spike of 20 buds.

EMPEROR (Carl Fischer, Ralph Baerman '58) 471-85

A true aristocrat, this glad of regal purple trimmed in ermine-white presents a stately display. Emperor makes majestic spikes growing five feet or more tall with 7-8 of its round, recurved florets open at one time. The plants are unusually robust and the spikes consistently tall and straight. The rich, distinctive color of Emperor, its health and vigor, and ease of growing are characteristics which make it an ideal flower for the home garden. It has already distinguished itself on the show table as a seedling and it possesses the qualities of a champion.

CARIBBEAN (Ralph Baerman, Carl Fischer '57) 376-70

The delicate blue tones of this exciting novelty present an unusual combination of rare blue-violet petals handsomely embellished by a rich, deep violet throat and a small cream spear. CARIBBEAN opens from 9 to 11 precisely styled florets at one time in formal, double-row placement. It possesses a quality uncommon to many varieties and almost a rarity among "so-called blue glads", that of extreme vigor. In every way, CARIBBEAN displays to performance. It consistently produces tall, well-proportioned spikes and unusually healthy bulbs. It is the first distinctly ruffled blue-violet gladiolus. Every flower lover will want this striking novelty in his garden. Its refreshing beauty will make it a sure-fire winner in its class at flower shows.

SPARKLER (Carl Fischer '59) 313-80

As graceful as a butterfly and just as colorful, SPARKLER is a gay, happy combination of yellow and red. Not garrish, but a skillful blending of clear yellow shading somewhat deeper as it surrounds the bright red lips. The florets are ruffled with each petal tip fluted to give an airy butterfly-effect. The total picture, with eight open florets on an 18-bud spike, is both striking and harmonious. An arrangement of several spikes makes a stunning conversation piece. SPARKLER is a decorative type variety of gladiolus known in commercial circles as 300 size. The plants are very green, sturdy and straight. SPARKLER is the ideal glad for home use, but it should be equally eye-catching in the landscape picture.

LITTLE PANSY (Fischer '60) 277-70

All-America's first Tiny Tot! A petite and charming little gladiolus that will beguile you with its lively personality. The rich, velvety, deep blue, "pansy-like" blotches add an elegant touch to the quiet simplicity of the light violet florets. In fact, Little Pansy is a study in contrasts—a play of dark and light, of elegance and simplicity, of excitement and tranquility—the whole blending to an attractive composition of lasting beauty.

Little Pansy is a nicely proportioned Tiny Tot growing to a height of 30-32 inches. The early-blooming spikes of 16-18 florets are just the right size to use in arrangements. Actually, the Tiny Tot might well be called the ultimate in gladiolus arrangement material. Today's modern hostess demands flowers that fit her decorative scheme, and Little Pansy will please the most discriminating.

MAYTIME (Ralph Baerman, Carl Fischer '57) 442-70

A light-hearted charm surrounds this brightly colored glad. The gracefully ruffled deep, pure pink florets with their contrastly large white throats bring back the memory of the freshness of May-blooming flowers. MAYTIME is a lithesome glad of good height. It readily opens 8 to 10 florets on spikes of five and one-half feet tall. A robust grower, MAYTIME has wonderful plant health and makes fine, plump bulbs.

ROYAL STEWART (Ralph Pommert '56) 450-75

A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flowerheads frequently carry up to twelve flowers open at one time. Growth is vigorous and healthy, with the total height of the plants running about five feet. On the occasions when it has been exhibited at gladiolus shows, ROYAL STEWART has proved to be an outstanding winner of top awards.

APPLEBLOSSOM (Ralph Baerman, Carl Fischer '56) 460-65

A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. A vigorous, easy grower that performs excellently with only average culture. APPLEBLOSSOM will give you a new conception of gladiolus beauty when it blooms in your garden.

PLEASE READ CAREFULLY BEFORE ORDERING

MAKING OUT YOUR ORDER. Please put everything down on the order blank just as listed in the catalogue. After adding them up, figure your bulb discount and add on the extra bulbs of your choosing.

DISCOUNTS AND EXTRAS. On all cash orders from the **RETAIL** descriptive list of \$5.00 to \$10.00 you may select 10% extra in bulbs of your own choosing. From \$10.00 to \$20.00 you may select 15%, all over \$20.00 select 20%. Discounts do not apply to Collections, Special Offers, Wholesale orders or 1960 Introductions from Birchville Gardens or from other growers or originators.

MINIMUM ORDER. Due to the continued rise in general, we will be unable to accept orders for less than \$3.00. No orders will be accepted for less than the smallest unit listed in the retail list for each variety, except that when the smallest unit is ten, five bulbs will be sold at one-half the ten rate. Where bulbs are priced singly, ten bulbs will be sold for the price of eight.

SHIPMENT. Unless otherwise requested retail orders will be sent out between March 1 and April 1 or sooner, if weather permits. Wholesale orders will be shipped as soon as possible after receiving them. All retail orders will be sent prepaid to all points in the United States.

F.O.B. ITEMS. If your order contains both f.o.b. and retail items, we will ship them together in one package f.o.b. but will give enough overcount and extras to more than offset the carrying charges on the retail items.

SUBSTITUTIONS. We will not substitute varieties or size unless your order specifically instructs us to do so. It is advisable to specify a second choice of variety or size, particularly if your order is placed late in the season.

CANADIAN CUSTOMERS. All Canadian orders must be accompanied by import permit. Apply Division of Plant Protection, Science Service, Ottawa, Canada for permit and mailing label for bulbs and bulblets.

SIZE OF BULBS. L indicates large size bulbs measuring more than 1 1/4 inches in diameter. M is a medium size bulb, 3/4 to 1 1/4 inches in diameter. S indicates a small bulb, under 3/4 inch in diameter. Blbts. stands for bulblets.

You will get best results from the large bulbs. They will produce the best show spikes. Medium size bulbs will often produce show quality spikes, and will produce good saleable spikes. Small bulbs will in most cases bloom. The spikes they produce are not top quality, but you will get a large bulb to grow on next year; they also produce quite a few bulblets.

GUARANTEE. We make every effort to keep our stock true to name and free from disease and insects. Please open the package immediately upon receipt, examine carefully, and if not satisfactory, advise us at once. All of us make errors once in a while and if any of the bulbs are found to be not as represented, we shall either refund your money on their return, or we will replace the unsatisfactory stock. However, we can at no time be liable for more than the original amount paid for the bulbs. All orders are placed with this understanding. All stock has been state inspected.

THE GLADIOLUS CLASSIFICATION SYSTEM

The number after the name of each variety in our general descriptive list denotes the official size and color classification of that variety as determined by a committee of the North American Gladiolus Council. We list these classification numbers because they are helpful to customers in determining the exact size and color classification of varieties they may want to buy or to exhibit at glad shows conducted under the auspices of the N.A.G.C., where this classification system is used.

Glad's are classified in five sizes as follows:

Miniature Glads 100—Florets under 2 1/2 inches
Small Glads 200—2 1/2 inches up to 3 1/2 inches
Medium Glads 300—3 1/2 inches up to 4 1/2 inches
Large Glads 400—4 1/2 inches up to 5 1/2 inches
Giant Glads 500—5 1/2 inches and larger

For instance, the second variety shown in the alphabetical list, Albert Schweitzer, is followed by the number 436. The 400 means it has a floret size from 4 1/2 inches through 5 1/2 inches. The 36 designates this variety as a scarlet.

Hence the numbers after the variety names tell the story of the size and color of the individual floret as grown under field culture from large bulbs. An odd number as the last digit denotes a conspicuous marking. Thus Albert Schweitzer, 436, is a scarlet without markings; while Balalaika also a scarlet, 437, has prominent markings.

COLOR CLASSES:

00 White	00 Without consp. mark	46 Red	46 (Light)

Pink	42 (Medium)	Smoky	
Pink	44 (Deep)	90 Tan	
		96 Brown	

* C.M. Stands for Conspicuous Marking.

The odd third digit or figure, 1, 3, 5, 7, and 9, designates conspicuous markings such as darker blotches and feathers, or contrasting color margins.

General List of Recent Introductions

All our bulbs are plump and healthy, and both large and medium bulbs are of blooming size. Small bulbs usually produce blooms late in the season. Bulblets seldom bloom the first year and a small percentage always fail to germinate—the rest grow mostly into medium and small bulbs.

Large bulbs always produce the finest exhibition spikes and sometimes throw several spikes from the bulb. Medium sized bulbs give excellent spikes particularly when planted early in the season. Small sized bulbs can produce good spikes but as a rule seldom give much more than medium sized spikes, but produce large bulbs for the following season.

Large bulbs are 1¼ inches in diameter or over; medium are 1 inch to 1¼ inches; and small bulbs are ½ to ¾ inch. L. = large, M. = medium, S. = small, blbts. = bulblets.

Clean velvety dark red with a cream line on lower petals. Opens 8 to 10 wide open flaring florets on a spike of 20 to 22 buds. Makes huge spikes up to 65 inches with 30 inch flowerheads. Probably the best of the dark red varieties.

(L 1-1.00; 10-8.00) (M 1-.75; 10-6.00)
(S 1-.50; 10-4.00) (Blbts. 5-.50; 100-8.00)

PAPOEA (Salman '55) 590-85

(L 2-.35; 10-1.40) (M 2-.25; 10-1.00)
(S 3-.25; 10-.80) (Blbts. 40-.25; 100-.50)

PARAGON (White '56) 414-100

Paragon is a sport of Ivy Robertson and duplicates its performance but the color is pale yellow. It is a tall grower with 6-8 nicely ruffled blooms open on a long flowerhead. Certainly going to be hard to beat in its color class.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Blbts. 10-.25; 100-2.00)

PARTY RUFFLES (Rich '57) 410-80

A beautiful dream of very heavily ruffled cream, with a suspicion of pink showing thru the petals, like a pink slip showing a hint of color under a girl's ruffled, frothy, party dress. It will open 8-9 of its large lovely florets at a time on fine sturdy spikes. A great prospect for show and commercial. It already has an outstanding show record.

(L 1-.50; 10-4.00) (M 1-.40; 10-3.20)
(S 1-.25; 10-2.00) (Blbts. 10-.50; 100-4.00)

PATMOS (McRae '56) 586-90

A very beautiful rose-ash with brilliant rose throat. The color is soft and beautiful—not harsh. Far better than Tan-Glo, though may not hold so many open. Opens 8, 5½ to 6 inch, ruffled florets on a 20 bud spike with 5-8 showing color, 26 inch head, 5 feet or more tall. Good placement and attachment. Strong, straight stems. Good propagator.

(S 2-.20; 10-1.60) (Blbts. 15-.25; 100-1.00)

PICOTEE (Holland)

This glad should not be confused with the miniature bearing the same name. Picotte is a cream-white with a pink margin. It is a very good tall grower, opening 5 to 7 florets at one time. A new one from Holland that should make a good cut flower.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-1.60) (Blbts. 25-.25; 100-.75)

PINK SENSATION (Holland)

Beautiful pale rose pink—actually, a glorified model of Tivoli. It is a tall stately grower that opens 8 to 10 in perfect placement. This will become very popular as a cut flower.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 15-.25; 100-1.00)

REDCOAT (Jack '57) 446-85

REGINA COELI (Salman '59) 500-68

A new, large, pure white from Europe that opens 6 to 8 blooms on good spikes from small bulbs. We are looking forward to seeing this from large bulbs in 1960. This variety came to us with a high recommendation and looks like a good early cut flower, as well as a show contender.

(L 1-1.25; 10-10.00) (M 1-.75; 10-6.00)
(S 1-.50; 10-4.00) (Bibts. 3-.25; 10-.75)

REMBRANDT (Howell '59) 387-78

An excellent mahogany colored smokey. A good spike can always pick up a blue ribbon. The basic color is reddish brown with a smokey plum overcast and a bright red spot in the throat. Tall thin spikes of 22 buds with as many as 9 to 10 open at once. An easy grower and a good propagator. No short or stubby spikes.

(L 1-1.00; 10-8.00) (M 1-.75; 10-6.00)
(S 1-.50; 10-4.00) (Bibts. 2-.25; 10-1.00)

RIMROCK (Kroon '59) 487-85

This is a very fine smoky pink, with a very striking white throat or blotch. Florets are firmly attached and have excellent texture with 6 to 8 open. It has good facing and placement on a 54 inch straight, sturdy stem. The tip of each cut spike remains erect and blooms out perfectly. Bulb production and germination are excellent. We do not hesitate to recommend it as a worthy addition to the Glad Fraternity.

(L 1-.75; 10-6.00) (M 1-.60; 10-4.80)
(S 1-.50; 10-4.00) (Bibts. 10-.50; 100-4.00)

RIVIERA (Fischer '59) 520-90

One of the best '59 introductions. A rich autumn-toned orange-buff with heavy substance. Florets are beautifully or delicately ruffled with 8 open on a spike of 20 buds. This is a beautiful variety and must be seen to be fully appreciated.

(L 1-.75; 10-6.00) (M 1-.50; 10-4.00)
(Bibts. 3-.25; 15-1.00)

ROCKET (Hatch '58) 449-75

Deep red, similar to Red Charm in color, with a small white spot on the lip. Opens 8 to 10 on a 30 inch flowerhead. The texture, placement and attachment are good. This should make a good early commercial.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Bibts. 15-.25; 100-1.00)

ROSA (Flad '57) 454-75

This is an early glad whose color is medium to deep rose and somewhat on the purple side. It opens 6 to 7 nicely ruffled florets on a 21 bud spike. Introduced as a commercial, it also has an enviable show record. Superb grower.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Bibts. 15-.25; 100-1.00)

ROSEDENE (Warr '59) 454-65

A sensational very early prospect for cut flower growers and exhibitors. The gorgeous, heavily ruffled pure rose $4\frac{1}{2}$ inch florets with its clear white throat are needlepointed and are well attached on 26 inch heads, carrying 20 to 22 buds. Field height 56 inches with good propagation.

(L 1-1.00; 10-8.00) (M 1-.75; 10-6.00)
(S 1-.50; 10-4.00) (Bibts. 3-.25; 10-.70; 100-6.00)

ROYAL LADY (Kooy '57)

A medium pink with a deeper rose-pink feathering and a cream throat. It opens 7 on a good tall spike and is an excellent grower in every respect. Excellent propagator.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Bibts. 15-.25; 100-1.00)

SALMON QUEEN (Schrenck '55) 534-80

Color is a clean, medium salmon with a cream throat. It will open 8 or 9 of its large, well attached, lightly waved florets in perfect placement on heads of 30 inches. Spikes are perfectly straight. One of the best show varieties.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Bibts. 8-.25; 100-2.50)

SANTA FE (K&M '57)

A very fine deep scarlet that opens 7 to 9 large florets on tall straight spikes. The fact that this variety is very early blooming makes it attractive to cut flower growers. We feel it can also win at the shows.

(L 1-.30; 10-2.40) (M 1-.20; 10-1.60)
(S 2-.20; 10-.80) (Bibts. 10-.25; 25-.50)

SARANAC (Rupert '58) 370-70

A very fresh clear, light violet 45 to 50 inches tall having 20 to 22 buds with 6 open. The plant seems healthy and vigorous, has strong straight spikes and the facing and placement of the florets are excellent. Propagation is very good. Certainly one of the best and most reliable blue for cut flowers.

(L 1-.30; 10-2.40) (M 1-.20; 10-1.60)
(S 2-.30; 10-1.20) (Bibts. 20-.25; 100-.75)

SCARLET LEADER (Salman '54) 436-85

A superb Holland introduction which is actually red in color. Opens 10 well placed florets on formal spikes. A very rugged grower that should become an outstanding commercial and show variety.

(L 1-.25; 10-2.00) (M 2-.25; 10-1.00)
(S 4-.25; 10-.50) (Bibts. 40-.25; 100-.50)

SHAMROCK (Howell '57) 404-70

A light yellow, tinted light green with green buds. As many as 10 florets open and has a flowerhead of about 30 inches with 20-21 buds. This has the cleanest color, is the healthiest and one of the best green glads. Women love it for arrangements. Good commercial prospect as it is very early.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Bibts. 10-.25; 100-2.00)

SNOW GARLAND (Lacey '59) 400-85

The individual florets of Snow Garland are beautiful. They are of heavy texture and fairly heavily ruffled. Opens as many as 12 of its 21 buds at once. Flowerheads are 25 to 27 inches. Propagation is heavy. About the ultimate in a ruffled white gladiolus.

(L 1-2.00; 10-16.00) (M 1-1.50; 10-12.00)
(S 1-1.00; 10-8.00) (Bibts. 2-.50; 10-2.00; 100-16.00)

SUGAR ELL (Vennard '59) 434-95

A fiery salmon or coral color, with 19 or 20 buds, 5 inch florets, and spikes that will reach to a man's eyebrow, without special attention. We make no strong claims that this glad will win in any show or in any particular competition, but we do contend that it is especially fine as a cut flower and for bouquet, basket or vase use. It will open from tight bud and keep perfectly for several days. It blooms late, coming along when many other glads are gone and continuing to bloom until frost stops it. Makes excellent spikes from fives and sixes. A very strong healthy grower that makes bulbets liberally that are easy to grow.

Any size, each .40; 6 for 2.00; 10 for 3.50;
25 for 7.50; 100 for 20.00.
Special 6 bulbs and 50 bulbets, 4.50.

SWISS FLAG (B&P '53) 437-80

A vermilion red with white blotch, grows up to 50 inches tall holding 6-8 open blooms that are perfectly placed. Somewhat on the order of Leah Gorham and Carnival. A universal favorite with garden visitors.

(L 1-.25; 10-2.00) (M 1-.25; 10-1.20)
(S 2-.20; 10-.80) (Blbts. 25-.25; 100-.75)

TABARIN (K&M '56) 435-80

The main color is salmon pink with a distinctive blood-red blotch on deep yellow on the three lower petals. Good placement and attachment with 6-8 open on tall wiry stem. Highly recommended because of its vivid, exotic colors.

(L 2-.35; 10-1.40) (M 2-.25; 10-1.00)
(S 3-.25; 10-.60) (Blbts. 25-.25; 100-.75)

TANGO (Howell '59) 524-85

Very large, flat, wide open, round florets, 5½ to 6 inches. Light to medium orange, deepening at the edges, lighter

toward the throat, with a bright red blotch on yellow. Its long massive spike has a 30 inch flowerhead bearing 20 buds. The florets are slightly ruffled with 7 to 8 open at one time. Excellent for exhibition or cut flower use. Healthy and an excellent propagator. Makes saleable blooms from early planted bulblets. Blooms midseason to late.

(L 1-1.00; 10-8.00) (M 1-.75; 10-6.00)
(S 1-.50; 10-4.00) (Blbts. 2-.25; 10-1.00)

TARGET (Larus '57) 441-80

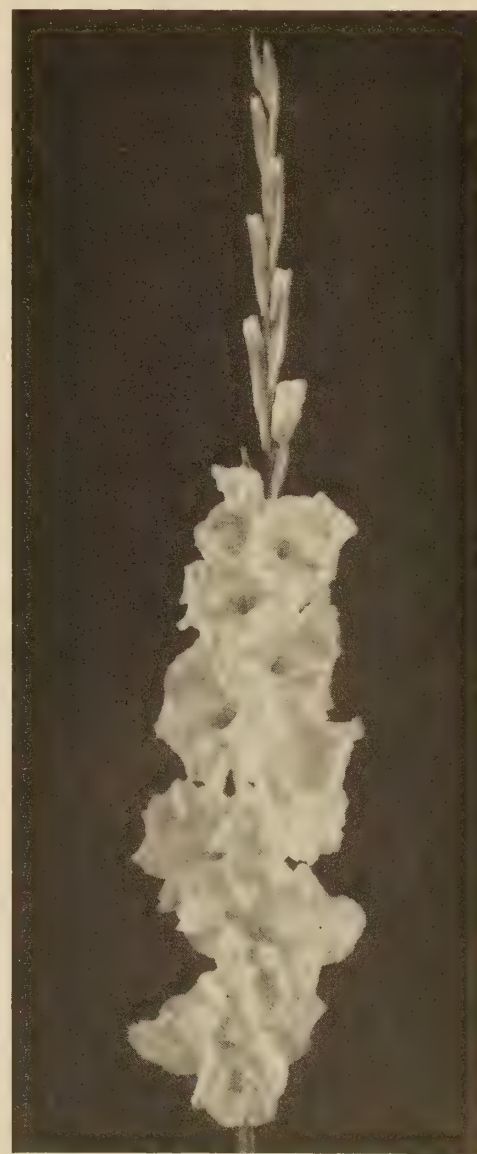

An extremely vigorous and healthy grower. It will throw spikes 55 to 60 inches tall with flowerheads of 27-30 inches long. It opens 6-8 from a total of 18-20 buds. The 5½ inch florets, which are a light blush pink shading to a cream throat with a large light red blotch, are quite unusual and striking.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Blbts. 10-.25; 100-2.00)

TEMPTRESS (Fairchild) 440-80

Very light pink with a few deeper pink lines in the throat. Opens 9 to 11 formally placed 5 inch florets with 8 showing color. Spikes with over 30 inch flowerheads and 25 buds are common. Has been a consistent blue ribbon winner at the shows.

Has five inch blooms. 22 to 24 buds with 8 to 10 blooms open and 6 to 8 buds in color. Florets are firmly attached and have wonderful substance. ZORRO (Kroon '59) 467-85

A very striking novelty that is really a study in contrast. Very deep rose in color, its queenly elegance is enhanced by a most exquisitely dashing, large diamond-shaped greenish yellow blotch. The 50 inch spike cuts loose with a long flowerhead having 6 to 8 well opened florets in very good placement. Since Zorro is a vigorous grower, it naturally is a good increaser and produces fine, clean bulbs. Really this should become immensely popular.

Standard One Price Varieties

The following popular varieties contain the best of the proven exhibition and commercial types and are being grouped at one standard price to enable our customers to select these varieties without looking up prices separately. Cost is no criterion of the charm and beauty of a Gladiolus. In most cases prices are not reduced to this low level until the variety has proven its worth. We don't offer a variety solely because it is new and the price is high; neither do we drop one from our list because it reaches a low-price field. What we do offer is potential beauty, in bulbs of such health and vigor, that you may confidently expect to realize in your garden the possibilities that have already made you a Glad Fan.

Large Bulbs 2 for .35; 10 for \$1.30; 25 for \$2.60

Medium Bulbs 3 for .30; 10 for .85; 25 for \$1.70

Small Bulbs 10 for .40; 25 for .80

Bulblets: Pkg. of 50 or more .40

The 10 for \$1.30; and 25 for \$2.60 prices are applicable to one individual variety, not to different ones priced alike. No order accepted for less than 2 large, 3 medium, or 5 small bulbs of any variety.

A. B. COUTTS (Coutts '53) 520-85

Spikes are tall and straight carrying 22 to 24 buds, opening 8 with 8 or more in color. The 6½ inch florets are well placed and attached. Propagation is excellent and makes clean bulbs.

ACE OF SPADES (Sisson '50) 458-85

One of the darkest of the black reds. Clear glistening deep black with silky sheen and buds of jet black. Opens 4 or 5 large very nicely waved and ruffled florets on tall spikes. Very popular with those who like the dark ones.

Bantams and Moppets

In the past few years there has been a decided increase in the interest shown in miniatures. There are probably several reasons for this, but we think the most important is that miniatures are the perfect home arrangement flowers. More florists and home arrangers have come to see the value of this type for small arrangements. They are unsurpassed in making up table decorations, their grace and delicacy, as well as small size, make them the perfect flowers for bridal bouquets, cascades, corsages, mantle pieces, and other dainty arrangements where larger varieties would be out of place.

ALECIA (MacPhail '54) 200-60

One of the very best white miniatures. Alecia is pure white even to the stamens. Opens 5-6 well placed blooms on a spike of 16 buds. A prize winner that will be in big demand.

CHOCOLATE CHIP (Fairchild '58) 296-75

A real dark brown glad in the style of Atom, even to the hairline silver edging. Has been extremely healthy, and a vigorous grower, producing plenty of easily germinating bulblets. Opens 6 or 7 florets in typical miniature placement on slender stems with a head length of about 19". We consider this a great improvement over Spunky, which has been a leader in its class.

GOLDETTE

DIMPLES (Rohrbach '58) 340-85

Of the many better known introductions the past several years, none are quite as beautiful, in our opinion, as Dimples. The nicely ruffled florets are a clean medium salmon pink shading to a cream yellow throat with a small red blotch. Opens 6 to 8 perfectly placed $3\frac{1}{4}$ to $3\frac{1}{2}$ inch florets on tall spikes with 18 to 23 buds. Really, a sensational show miniature.

(L 1-.50; 10-4.00) (M 1-.40; 10-3.20)
(S 1-.25; 10-2.00) (Blbts. 10-.40; 100-3.00)

DONDI (Kroon '58) 320-70

Beautiful orange salmon-buff with rose blotching plus some yellow at base of blotch. It has a slender whip-like stem, having 18 buds with 7 to 8 well placed florets open at once. At the Pacific International Show at Grant's Pass, Oregon, this attracted a great deal of attention and was awarded the American Home Achievement Award. Dondi is superb in the garden and exquisitely beautiful for arrangements. Good propagator and bulblets germinate easily and is a healthy variety.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Blbts. 10-.25; 100-2.00)

EMILY'S BIRTHDAY (Butt '55) 235-70

The earliest blooming variety we have ever grown. Opens 5 to 7 on a slender 17 bud spike. Florets are ruffled and measure 3 inches. The color is salmony orange with a yellow throat. Will fleck some under adverse conditions.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. Pkg. .40)

FAIRY (Kuhn '46) 260-75

Beautiful light lavender. Holds 5 to 7 open on tall wiry spikes. Color is nearly uniform, and is a shade that blends well on most any place you use it. Attractive and quite popular.

(L 1-.25; 10-2.00) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. Pkg. .40)

FALINE (Dirk Kroon '56) 314-75

An outstanding mighty fine addition to the miniature class, a very beautiful round flaring light yellow with deeper yellow blending throat, slightly ruffled and will open 7 with 5 showing color on a well balanced formal forty inch 17 bud spike. Substance is very good and foliage always green. Makes clean healthy bulbs and is an excellent propagator. We might say it's a miniature Prospector, one of the most beautiful of all varieties. One of the outstanding introductions of 1956.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. Pkg. .40)

FLASHLIGHT (Roberts '53) 337-70

Flashy salmon-scarlet with a large clean-cut bright yellow throat. There is no other glad just like Flashlight. It rated third most popular glad of all sizes in last year's Popular Gardening Symposium. Grow some and see why!

(L 1-.20; 10-1.60) (M 2-.30; 10-1.20)
(S 2-.20; 10-.80) (Blbts. Pkg. .40)

FROLIC (Bork 53) 217-80

Spectacularly blotched small yellow. Opens 5 informally placed florets on head of 15 to 17 buds. Large bulbs will produce up to 3 graceful spikes. One of the better new miniatures. A knockout for arrangements.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)
(S 5-.30; 10-.50) (Blbts. Pkg. .40)

GAILY CLAD (Hardy '51) 215-75

One of the brightest and most spectacular miniatures. Clean yellow with orange blotch. Heavily ruffled, good texture and attachment. Opens 5 wide open blooms.

(L 2-.30; 10-1.30) (M 3-.25; 10-.85)
(S 5-.30; 10-.50) (Blbts. Pkg. .25)

**GREEN THUMB**

GREEN THUMB (Butt '56) 214-70

Buds are so beautiful, like rosebuds, and really green. Fully open, deep greenish yellow, deeper in the throat, a solid unmarked color without blemish. The general effect of an arrangement of **Green Thumb** or a corsage is that of the Lady Slipper Orchid — Beautiful! Floret form is outstanding. Deeply ruffled and very heavy substance. Physical characteristics are as follows: Height 38"-40", 20" flowerheads, 16-17 buds, 7-8 florets open, 5 in color, straight spikes and excellent placement and attachment.

(L 1-.20; 10-1.60) (M 2-.30; 10-1.20)

(S 2-.25; 10-1.00) (Blbts. 10-.30; 100-2.50)

LIFE (Butt '56) 236-70

Fine, clear, light red with sharply contrasting yellow throat. This startling glad is a real beacon for all visitors to our gardens when in bloom. Plants run 36-38" and the slender spikes are always straight. Runs 16-18 buds with 6 to 7 three inch heavily ruffled florets open, well-placed and attached. This lovely ruffled miniature will steal your heart and for arrangements is a knockout.

(L 1-.40; 10-3.20) (M 1-.30; 10-2.40)
(S 1-.20; 10-1.60) (Blbts. 10-.25; 100-2.00)

LITTLE SWEETHEART (Fischer '48) 240-85

Little Sweetheart is a "love at first sight" type of glad — it has that romantic type of beauty that one dreams about but rarely sees. Its waxy snowy-white throat, pink school-girl complexion and excellence of form, place it at the top of its class.

(L 2-.35; 10-1.30) (M 3-.30; 10-.85)

POLAR CUB (Evans '53) 200-85

An extremely vigorous grower with 22 to 30 inch flower-heads. The spikes from large bulbs will average about 23 buds with 10 open and 8 in color. The best exhibition white miniature.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Blbts. 10-.25; 100-2.00)

SALMON CRINKLES (Rohrbach '58) 330—75 days

A sister seedling of Dimples (Wedgewood x Strawberry Peach) with about the same floret and spike characteristics. The color is a soft salmon and there are a few inconspicuous markings in the throat. Also healthy and a good bulblet producer. A worthy companion to Dimples and a variety we are sure you will like.

TAMMY (Kroon '58) 240-65

A lovely medium pink shading to salmon with a light yellow blending in the throat. Florets are quite ruffled and are well placed on a spike of 16 buds with 6 open at a time. From large and medium bulbs spikes will have two well extended side shoots which makes it ideal for florist work and home arrangements. Should become very popular and will win more than its share of ribbons at the shows.

(L 1-.35; 10-2.80) (M 1-.25; 10-2.00)
(S 2-.30; 10-1.20) (Blbts. 10-.25; 100-2.00)
